Walls

Roof trusses

Open-web floor trusses

Floors

PREFABRICATED

## A WIN-WIN SITUATION!

Whether your project is simple or complex, our products offer many advantages and practical benefits:

- Custom-made and not affected by bad weather; the materials keep their shape for impeccable installation.
- Elimination of the problems of theft and waste of materials on the building site.
- Delivery by trailer within agreed upon time limits.
- Assembly or installation drawing included with all of our products.
- Quick installation to easily meet deadlines.
- Ultra-rapid installation, reduction of labour costs and better project cost control.

Contact us now for a **FREE ESTIMATE**. Our specialists will recommend the product that is best suited for your project.

*A leading manufacturer of roof trusses, open-web floor trusses and prefabricated walls, Novofab Structure inc. has been offering solid, top-notch turnkey solutions.*

### STANDARD PREFABRICATED WALLS

Our prefabricated walls are made according to your specifications and comply with construction industry-recognized standards. Easy to put up, their use represents significant savings in terms of installation time and labour costs. Either insulated or uninsulated, our walls can reach up to 40 feet in length.

**NOVOFAB**  
State-of-the-art prefabricated walls

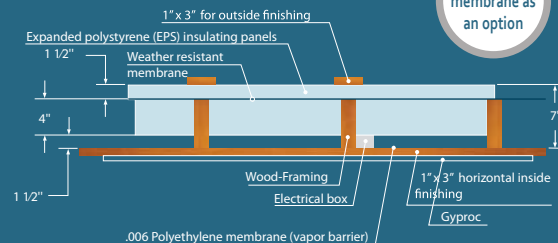

Using state-of-the-art technology, NOVOFAB walls are manufactured from expanded polystyrene and wood framing and eliminate thermal bridges by separating the structure from the outside face of the wall with insulation. **It's a high-performance insulation system providing R25 insulation, which exceeds the Novoclimat™ certification standards.** Two models are available. Acoustic membrane as an option.

For more information on Novofab walls, visit [www.novofab.ca](http://www.novofab.ca).

### ROOF TRUSSES

Novofab Structure also offers a complete range of roof trusses, regardless of the complexity of your project. Custom-made according to your specifications, they can be adapted to any residential, commercial, industrial or agricultural project and can reach up to 100 feet in length.

### WOOD OPEN-WEB FLOOR TRUSSES

Thanks to advanced technology, dried wood trusses with steel plates are extremely strong, flexible and reliable. Easy to install, they are custom-made or adjustable.

- Low walls and stirrups included.
- Open-web makes it easy to install plumbing and electrical wiring.

### PREFABRICATED FLOORS

Our prefabricated floors are made according to your specifications, with wood open-web floor trusses, and comply with construction industry-recognized standards.
